multimedia

- E-blocks compatible
- Low cost
- Connects version 2 development board to E-blocks system

This board is provides an interface between the version 2 PICmicro development board and the E-blocks system.

The adaptor connects to the development board using 40 way IDC connector and presents 4 E-blocks ports (A to D) on 9 way D-type sockets. The three lines on port E are available on a 4 way header.

1	Port A
2	Port B
3	Port C
4	Port D
5	Expansion connector
6	Port E
